EDUCATION

Rajalakshmi Engineering College *2024 – 2028*
B.E. Computer Science and Engineering — CGPA: 9.17

Raj Matriculation Hr. Sec. School *2024*
HSC (Class XII) — 91.67%

Raj Matriculation Hr. Sec. School *2022*
SSLC (Class X) — 89%

EXPERIENCE

Backend Development Intern, Zenvic Software Solutions Pvt. Ltd. *June 10 – July 10, 2026*
Project: InfraMind – AI-Powered Incident Infrastructure Management System | Tech Stack: Python, FastAPI, SQLite, REST APIs, Pydantic, Git, GitHub

- Developed backend services for InfraMind, an AI-driven infrastructure incident management platform, automating incident analysis and reducing manual incident triage effort by approximately 65%.
- Designed and implemented 10+ RESTful APIs for incident management, AI-powered root cause analysis, report generation, and health monitoring, enabling seamless integration between frontend and backend services.
- Built an AI-assisted postmortem generation module using LLM integration and prompt engineering, and a keyword/field-based incident memory system that retrieved similar past incidents, cutting documentation time by approximately 70%.

Web Development Intern, Zenvic Software Solutions Pvt. Ltd. *Dec 16 – Dec 31, 2025*
Tech Stack: HTML, CSS, JavaScript, React.js, Git

- Developed responsive web pages and reusable UI components, improving application usability and consistency across desktop and mobile devices.
- Built interactive frontend modules and resolved cross-browser UI compatibility issues, reducing navigation complexity and enhancing overall user experience.

PROJECTS

CrimeLens AI – AI for Predictive Urban Safety & Crime Intelligence *June 2026 – Present*
Tech Stack: Python, FastAPI, React, Next.js, TypeScript, OpenCV, Machine Learning, SQLite

- Developed an AI-powered crime intelligence platform integrating 6+ modules for crime hotspot prediction, pattern analysis, CCTV insights, and intelligent report generation to support data-driven policing.
- Engineered 12+ RESTful APIs and interactive dashboards with 10+ real-time visualizations, reducing manual analysis effort by approximately 60% during prototype evaluation.
- Designed a scalable modular architecture capable of integrating 1,000+ historical crime records and supporting future smart-city and surveillance enhancements.

Industrial Defect Detection System *April – May 2026*
Tech Stack: Python, TensorFlow, OpenCV, NumPy, Pandas

- Developed a computer vision-based defect detection system trained on the MVTec AD dataset (5,000+ images) to automate industrial quality inspection.
- Built image preprocessing and classification pipelines that achieved 94%+ validation accuracy, reducing manual inspection effort by approximately 70%.
- Optimized image processing workflows, decreasing inference time by approximately 35% compared to the initial implementation.

CheckMate – Real-Time Multiplayer Chess Platform *May – June 2026*
Tech Stack: React, Node.js, Express.js, Socket.IO, chess.js

- Developed a real-time multiplayer chess platform with 20+ chess rules and move validation logic via chess.js, supporting simultaneous gameplay using WebSocket communication.
- Reduced move synchronization latency to under 200ms during local testing by optimizing Socket.IO event handling.
- Built responsive dashboards and game interfaces with 100% mobile responsiveness, providing a seamless experience across desktop and mobile devices.

TECHNICAL SKILLS

Languages & Core: Java, Python, JavaScript, TypeScript, SQL, C++, Data Structures & Algorithms, OOP, System Design, DBMS, Operating Systems, Computer Networks

Frontend & Backend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, FastAPI, Node.js, Express.js, REST API Development, JWT Authentication

AI/ML & Databases: Machine Learning, Computer Vision, OpenCV, TensorFlow, Generative AI, Prompt Engineering, LLM Integration, MongoDB, MySQL, SQLite, Firebase

Tools & Deployment: Git, GitHub, Docker, Postman, VS Code, Vercel, Render, Agile Methodology, SDLC

ACHIEVEMENTS

- Solved 250+ Data Structures & Algorithms problems across LeetCode, GeeksforGeeks, and HackerRank, spanning arrays, strings, trees, graphs, and dynamic programming.
- Finalist, AI Nexus Hackathon — presented CrimeLens AI, an AI-powered platform for predictive urban safety and crime intelligence.
- Ranked School First in Class XI and School Third in Class XII; active participant in hackathons and technical workshops focused on AI, backend, and full-stack development.
